Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

Ms. Hanlon,

I am writing this message to express my support for and to urge the DOE to recommend Yucca Mountain as the permanent repository for spent nuclear fuel in the United States. While our country's demand to produce more power continues to increase year after year, while at the same time preserving our environment; nuclear power is the energy of the future. Our nation's nuclear power plants are rapidly nearing their capacity to store spent fuel on site and with no options currently available for interim storage, we are approaching a crisis. Therefore, I see Yucca Mountain as the safest and most viable option - the only option. We cannot wait another 20 years, or even 10; we must pass legislation without delay.

Sincerely,

Art Barsema
